

Lanex Australia

Offshore software developer outsourcing and staff augmentation for Australian teams, backed by 30+ years of cross-border delivery and a deeply vetted Philippines talent base.

Lanex Australia
Brisbane-based. Philippines delivery.

STAFF AUGMENTATION

OFFSHORE DEVELOPERS

AWS SELECT PARTNER

Company Overview

Lanex Australia helps businesses build software teams with pre-vetted Filipino developers working as a direct extension of the client team. The company serves organisations that need stronger engineering capacity without the cost, delay, or hiring friction of relying solely on local recruitment.

Lanex was founded in Sendai, Japan more than 30 years ago and expanded to Australia in 2018. Today the business operates from Brisbane while delivering software talent and technical support through teams in the Philippines for clients across Australia, New Zealand, Japan, the United States, and the United Kingdom.

Core Capabilities

Dedicated Developer Placement

Source, vet, and embed full-time developers who work inside the client team using the client's tools, codebase, and delivery process.

Technical Staff Augmentation

Scale engineering capacity across product, platform, maintenance, support, and transformation work without handing delivery control to an outside agency.

Cross-Functional Engineering Roles

Place full stack, frontend, backend, mobile, QA, DevOps, data, architecture, and UX talent aligned to the client's actual stack and operating model.

Operational Support and Oversight

Maintain continuity after placement through performance check-ins, replacement support, onboarding assistance, and relationship management on both sides.

Service Delivery Model

Lanex operates on a staff augmentation model rather than a black-box agency model. Developers are integrated directly into the client's systems and ways of working. Clients retain control of product direction, source code, intellectual property, sprint priorities, and technical standards.

Engagements are structured around month-to-month delivery with flat monthly pricing, no hidden recruitment fees, and a 30-day replacement guarantee. This model is designed to give Australian businesses predictable cost, cleaner accountability, and faster hiring velocity.

Roles and Technical Coverage

Application Development

Full stack, frontend, backend, mobile, and UI/UX support across modern web and app stacks.

Platform and Cloud

DevOps, AWS, infrastructure, reliability, deployment pipelines, and cloud operations support.

Quality and Delivery

Manual QA, test automation, regression coverage, and release-readiness support for product teams.

Data and Architecture

Data engineering, analytics infrastructure, system design, technical leadership, and software architecture support.

Industry Experience

Lanex has supported organisations across aged care, logistics, e-commerce, software platforms, media, field operations, and business systems. The company's public case studies reflect practical delivery in both new product work and long-term platform support.

Recent public examples include platform modernisation, ongoing application maintenance, product development support, and engineering capacity expansion for Australian businesses and software products.

Why Clients Engage Lanex

Hard Vetted Talent

Only the top portion of applicants progress through Lanex screening, including technical evaluation, English assessment, and background checks.

Direct Team Integration

Developers join the client team directly rather than operating as anonymous outsourced resources behind an account manager.

Cross-Border Delivery Maturity

Lanex combines Australian market support with long-standing experience delivering across Japan, the US, Europe, and APAC.

Commercial Clarity

Flat pricing, faster starts, and no long lock-in contracts make the model easier to evaluate and easier to scale.

At a glance

Brisbane-led offshore software delivery with Philippines-based engineering talent.

BUSINESS SNAPSHOT

- **Business:** Lanex Australia
- **Head Office:** Brisbane, Queensland
- **Origin:** Founded in Sendai, Japan 30+ years ago
- **Australia:** Operating locally since 2018
- **Delivery Base:** Philippines
